CAMPUS NOTES

The American Society for Steel Treating, Columbus Section, held a recent meeting in the Seneca Hotel. Mr. Enrique Touceda was the speaker. Professor J. O. Lord is now the secretary of this organization.

On Wednesday evening, January 14, the Student Society of Industrial Engineers held a very successful dinner meeting. Mr. C. G. Akers spoke on "Sales Engineering." His talk was illustrated with information drawn from his own experiences. The meeting was much enjoyed by the forty-five members present.

Howard Bentz is assisting Mr. Peter Morrison in the work in course I.E. 408. Bentz is very enthusiastic about his work as a Junior Professor.

On January 16, Dr. J. O. Perrine of the Information Department of the American Telegraph and Telephone Company and formerly of the Bell Telephone Laboratories, spoke to the junior and senior electrical engineering students. His subject was "Telephone and Power Engineering—A Contrast in the Application of Electrical Principles."

William H. Nesser, M.E. 4, represented the student branch of the American Society of Mechanical Engineers at their convention in New York City, December 2-8. Professors Marquis and Magruder also attended the meeting, Professor Marquis representing the Columbus section of the society. There are twenty thousand members of this society and 2562 were present at the meeting. Delegates were present from all parts of the United States and from many foreign countries. A subject of great interest to those attending was the national power show which was held in the city at the same time.

Professors Roberts and Stinson attended the annual meeting of The Society of Automotive Engineers which was held in Detroit.

Professor Roberts has been conducting a series of braking tests in cooperation with the police department of Columbus.

A wind tunnel, which has been in the process of construction in the M.E. lab, has recently been completed. Professor Fairbanks has been in charge of the construction.

SCHOLARSHIPS AWARDED

Last spring a competitive examination was held in which over two thousand high school seniors participated. The purpose of this examination was to award 133 scholarships from colleges and universities all over Ohio to deserving students. Of these 133 scholarships, 33 were for Ohio State.

In addition to the results of the examination, the student's attitude, behavior, ideals, and future promise, were considered. Of the thirty-three students awarded scholarships from this school,

twenty-one entered the college of engineering. One four-year scholarship was awarded and was won by J. R. Swartz, Arch.E. The two three-year scholarships went to Paul A. Mills, Ch.E. and Richard D. Danford, Ch.E. Four of the six two-year awards went to D. M. Gillespie, Ch.E.; R. A. Frankenberg, M.E.; H. J. Raabe, Ch.E.; R. R. Elasser, Ch.E.

The fourteen who won one-year scholarships are as follows:

R. G. Hill, E.E.; R. E. Frey, E.E.; E. M. Sherwood, E.E.; K. L. DeCarlo, M.E.; Henry Workmaster, M.E.; Ralph Thompson, Ch.E.; J. N. Beaver, E.E.; Delwin Kaufman, Ch.E.; H. D. Pence, Ch.E.; E. H. Ketner, E. E.; L. J. Copp, M.E.; Don Endres, Ch.E., and Wm. J. Lawless, Engr. Physics.

At the close of last quarter R. D. Ricketts was elected president of the A.S.M.E. for the Winter Quarter. A debating team has been organized and plans have been made to debate teams from other divisions of the engineering college. Jo Smith is in charge of the team. On January 9 the first meeting of the quarter was held. Professor W. T. Magruder spoke on "The Little Things in Life That Make for Success."

RADIO CLUB

Radio reception has not been as good as usual this winter, the Ohio State Radio Club reports; especially here on the campus is this true. In spite of this condition, the number of foreign stations communicated with is as large as ever. One of the transmitting sets is being rebuilt to operate on the 14,000 KC band. It will be available for either CW transmission or radiophone.

SPEAKS AT ALLIANCE

On January 10 Professor Thos. E. French of the Engineering Drawing Department spoke before the Women's Club of Alliance on the subject of "Etching."

The Lincoln Electric Company is sponsoring a contest on arc-welding improvements. The contest is in the nature of an essay contest. Papers will be judged and the awards made by the department of electrical engineering. The judging will be under the direction of Professor E. E. Dreese.

The Student Branch of the American Institute of Electrical Engineers held its first meeting of the quarter on January 15 at Pomerene Hall. The speaker of this meeting was Mr. G. E. Stoltz of the Westinghouse Company. In his talk he explained many new applications of electric power to industry.
